

Part 2.1: Maintenance Functions – PM

Calem Enterprise Training

Summer 2024

Austin, Texas

Goals

I know how to setup PM

I know how to create a time schedule for PM Plans

I know how to create a PM Plan

I know how to create a PM Round and Round Stops

I know how to create a PM for Round or Inspection

I know how to create a PM by meter readings/triggers

I know how to generate WO to test PMs

I know how to populate PM module via excel files

Asset and
Location

Maintenance
Schedules

Contract and SLA

Work Order

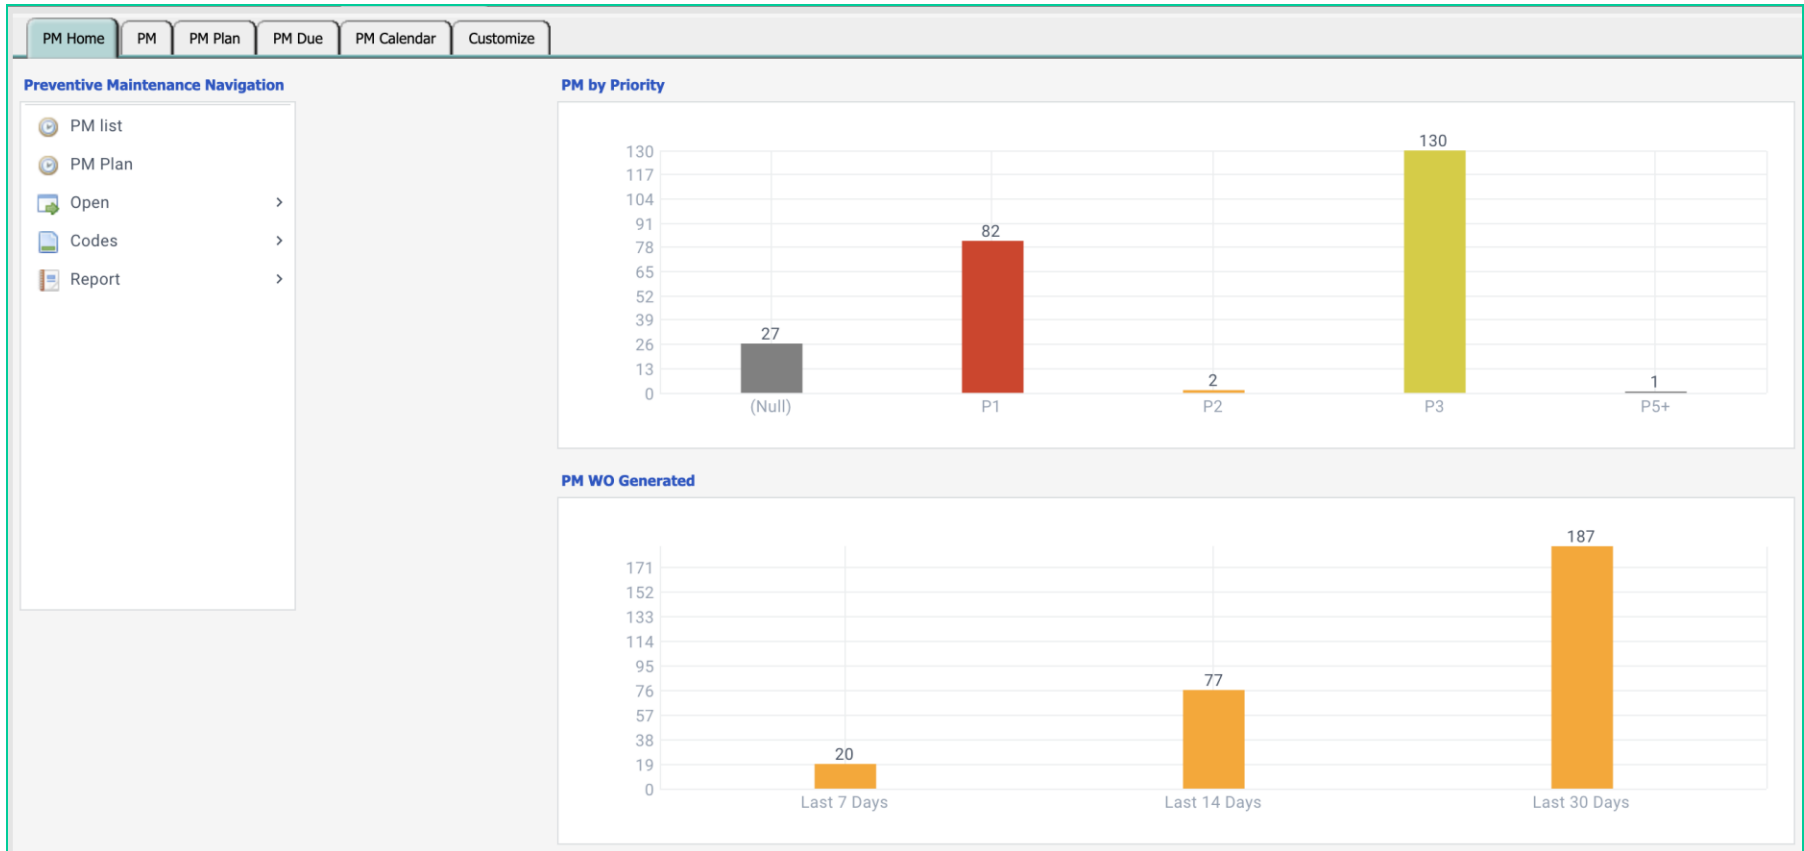

Service Request

Change Management

Product – Preventive Maintenance (PM)

CalemEAM

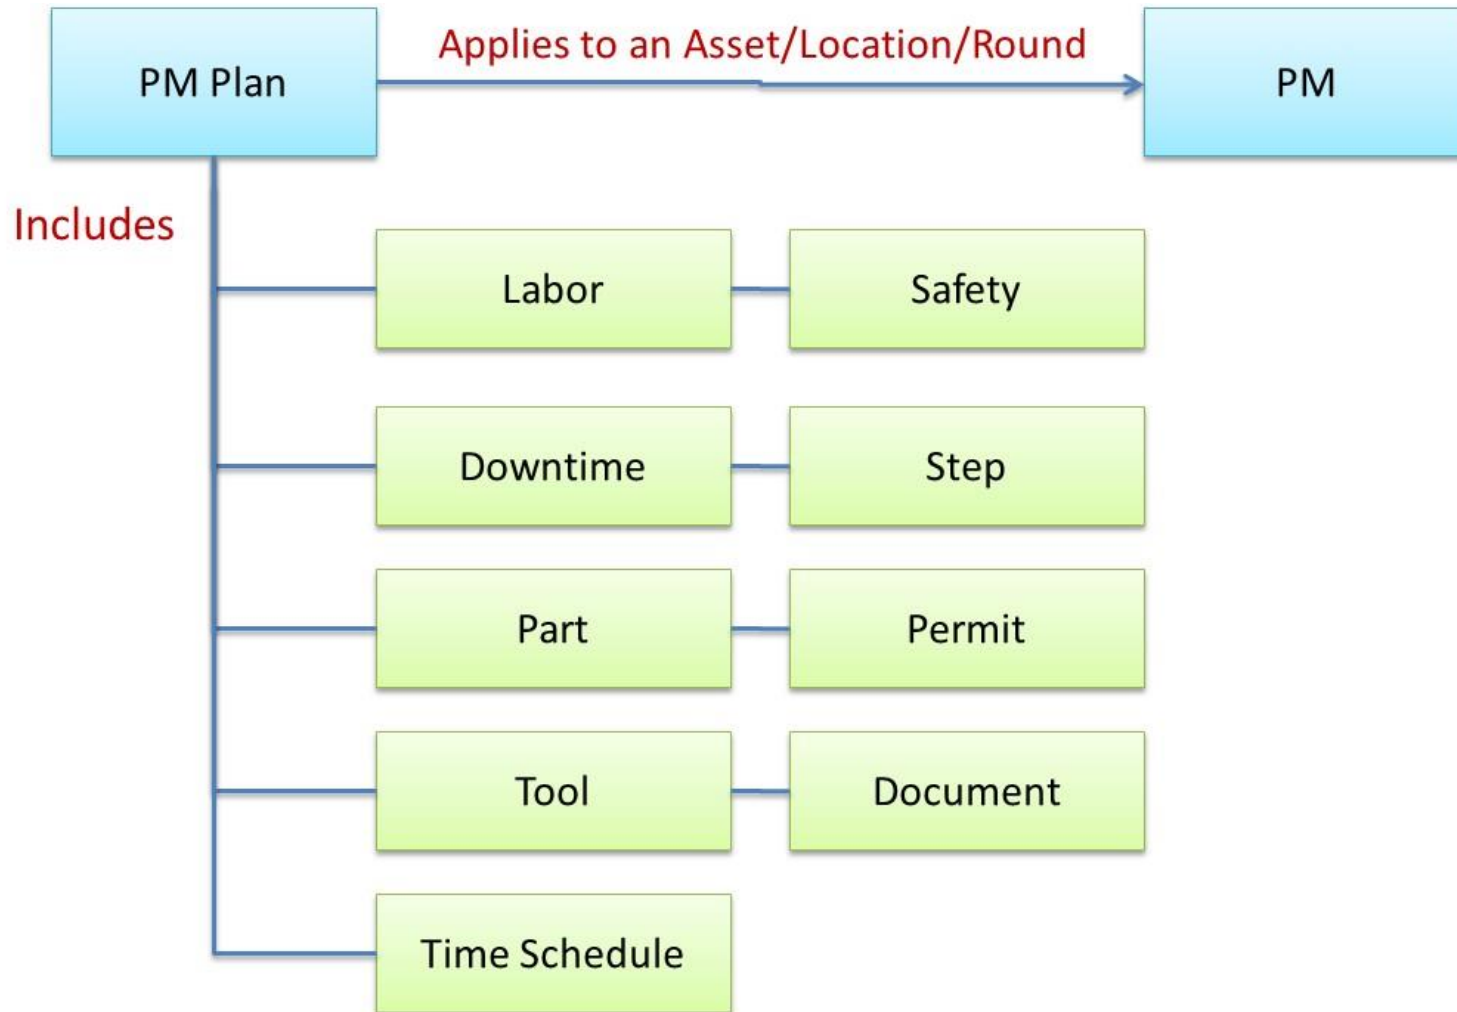

- Work Orders are generated from PMs

PM Module – PM Plan

CalemEAM

- PM Plan: What To-Do and How Often
- PM: Which Asset/Location and When

Schedules	PM Plan Attributes
By time	Fixed repeat schedule
By time and standing WO	Floating repeat schedule
By condition	Fixed meter readings
By condition and standing WO	Floating meter readings
By time and meter	Fixed repeat sched/meter
By time/meter and standing WO	Floating repeat sched/meter
No schedule	Meter trigger
No schedule	On-demand Template
No schedule	Boilerplate Safety/Steps

PM Module – Create PM Plan (1)

Description:

PM Module – Create PM Plan (2)

CalemEAM

- **Plan #:** the PM Plan number
- **Subject:** a short description
- **Status:** Active. An inactive PM Plan is ignored in work order generation
- **PM Type:** a type code. It's optional.
- **Category:** default is Preventive maintenance
- **Specialty:** a work order specialty code
- **Duration (hours):** estimated hours taken for perform this PM Plan
- **Schedule type:** default is by time. It can be by meter, or by time and meter.
- **Release type:** fixed for release by time regardless of work order completion status. "Floating" release type will not generate work orders till previous work orders from this PM are completed.
- **To get a PM to release on the last day of the month, select "31" for the "Day of month" for schedules by months.**
- **Review required:** acceptance of completed work order is required before a work order can be closed.
- **Reference:** a PM plan of reference cannot be used directly in PMs. They can be cloned and used in PMs.

PM Module – Create PM Plan (3)

CalemEAM

- **Site access:** PM Plan can be site specific if checked. Use “PM | Open | PM Plan Site” to assign sites that can use this PM Plan if checked.
- **No default steps:** do not copy boilerplate steps (see <http://www.calemeam.com/calemcustomers-2/boiler-plate-steps-in-pm-plan>)
- **Meter set:** if the PM Plan is a meter collection job (see <http://www.calemeam.com/calemcustomers-2/meter-reading-rounds>)
- **Sort #:** a custom sort field for sorting PM Plans
- **Repeat schedule:** the frequency of repeat of this PM Plan. This repeat schedule will be used in the PMs of the PM Plan unless overwritten in PMs.
- **Description:** A long description of the PM Plan.

- Use PM Round to perform PMs for multiple assets/locations
- Each asset or location represents a round stop to perform PM
- Each asset/location will be generated as a child work order for the PM

PM Module – Create PM (1)

CalemEAM

PM is the application of a PM Plan to an Asset/Location

- PM = PM Plan + Asset/Location + PM Round (Optional)
- Set “PM Plan”, an “Asset” or a “Location”
- Set “Next due” to generate WO from the PM
- Set “Days Ahead” to generate WO ahead of due time. Default is 7 days.
