

Part 3.1: Inventory Functions – Requisition & PO

Calem Enterprise Training

Summer 2022

Austin, Texas

What are the goals – REQ

CalemEAM

Goals

I know how to set up REQ roles

I know how to set up users and supervisors

I know how to set up vendor and items supplied

I know how to create requisitions

I know how to create repair requisitions

I know how to approve requisition and create POs

What are the goals – PO

CalemEAM

Goals

I know how to set up PO roles

I know how to create a PO

I know how to add REQ items to PO

I know how to approve a PO

I know how to send repair PO for off-site repair

I know how to receive repair PO

I know how to set up PO terms and conditions to print on PO

Inventory and
Warehouse

Requisition and
Purchase Order

Doc, Project,
Integration, etc.

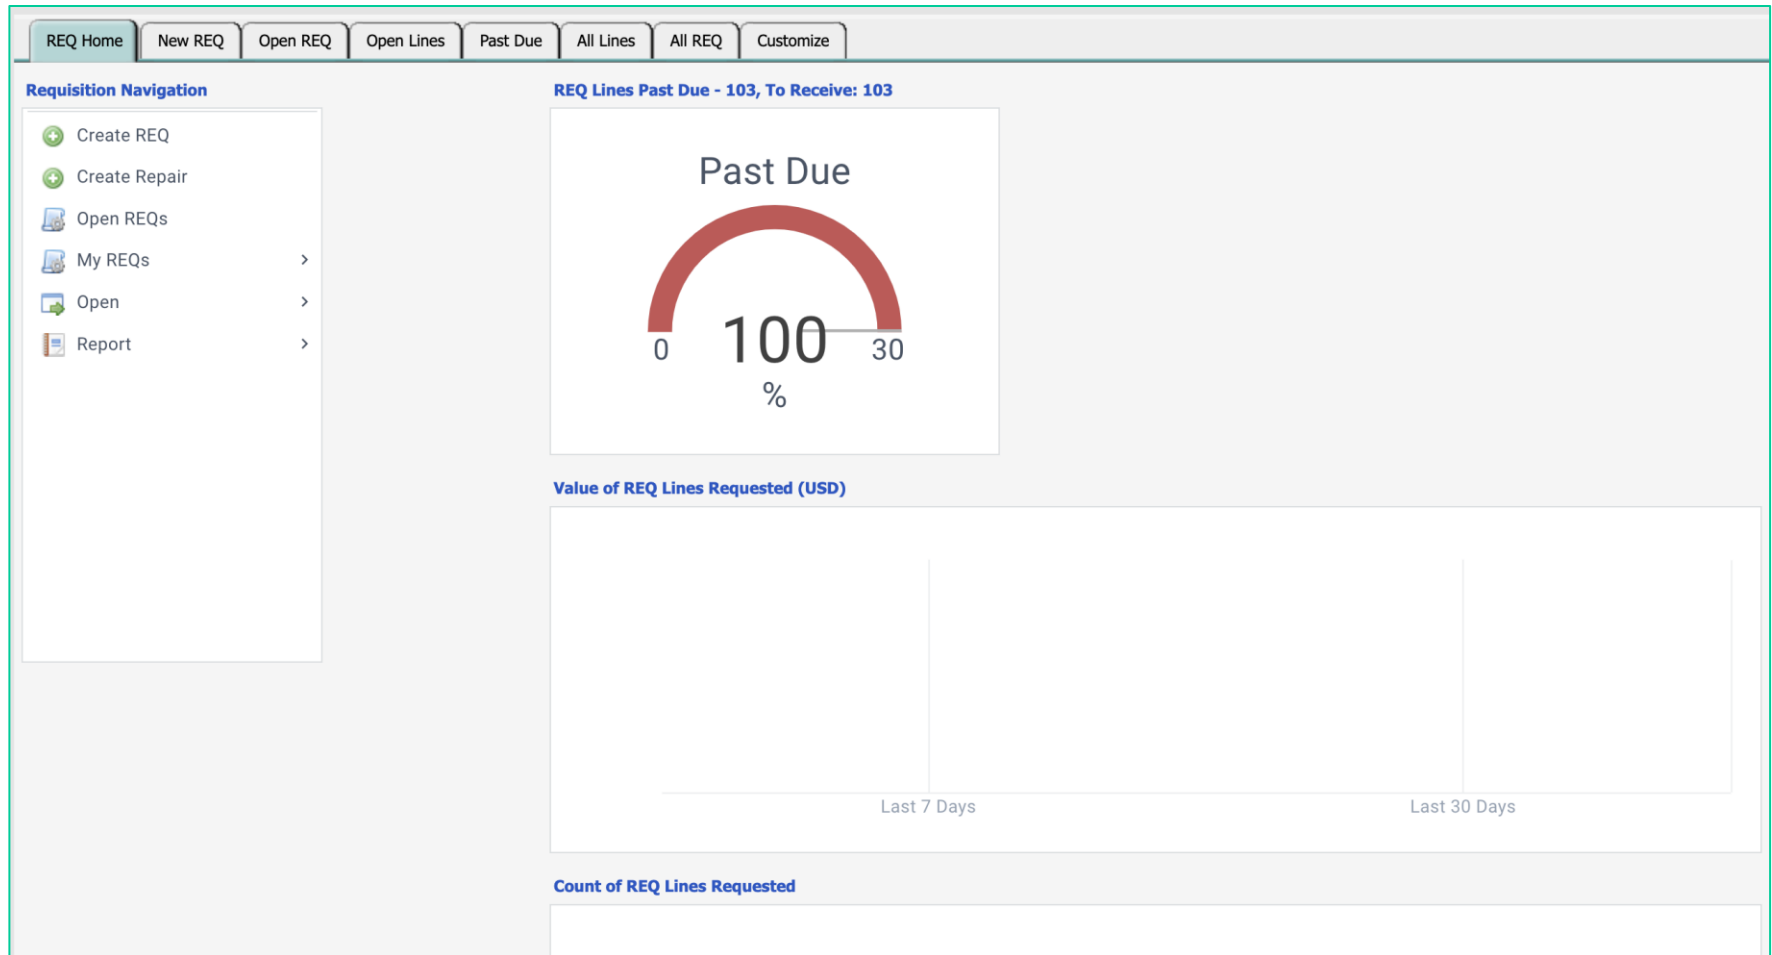

Product Overview – Functions

CalemEAM

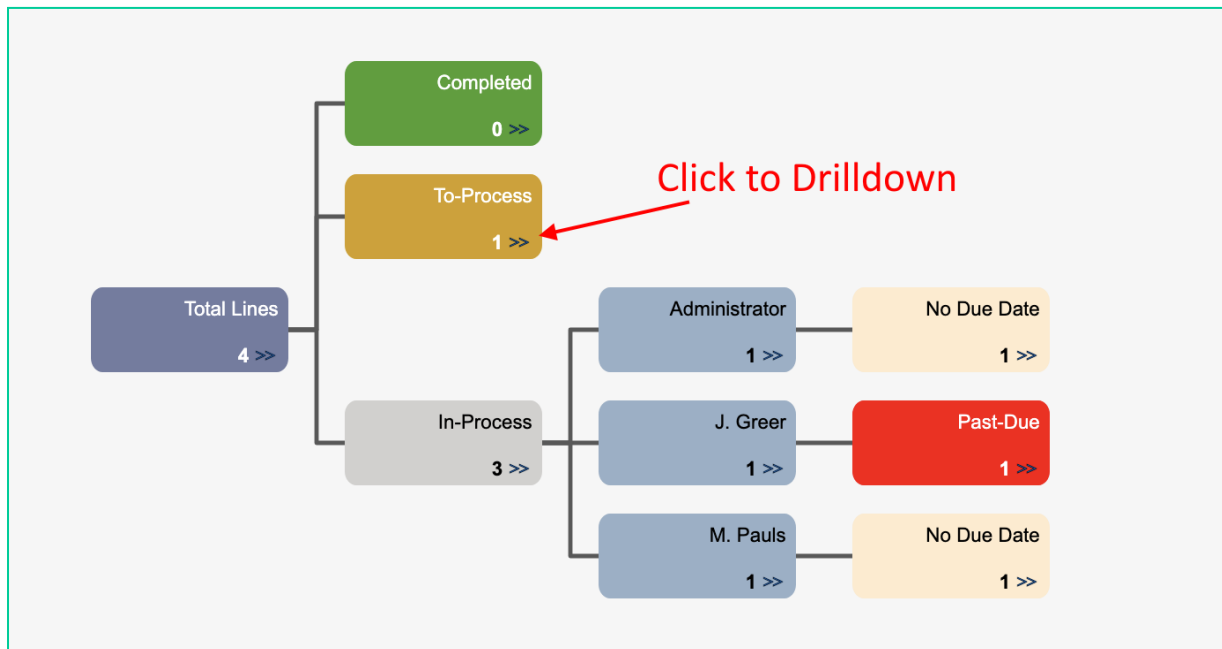

Product – Requisition

CalemEAM

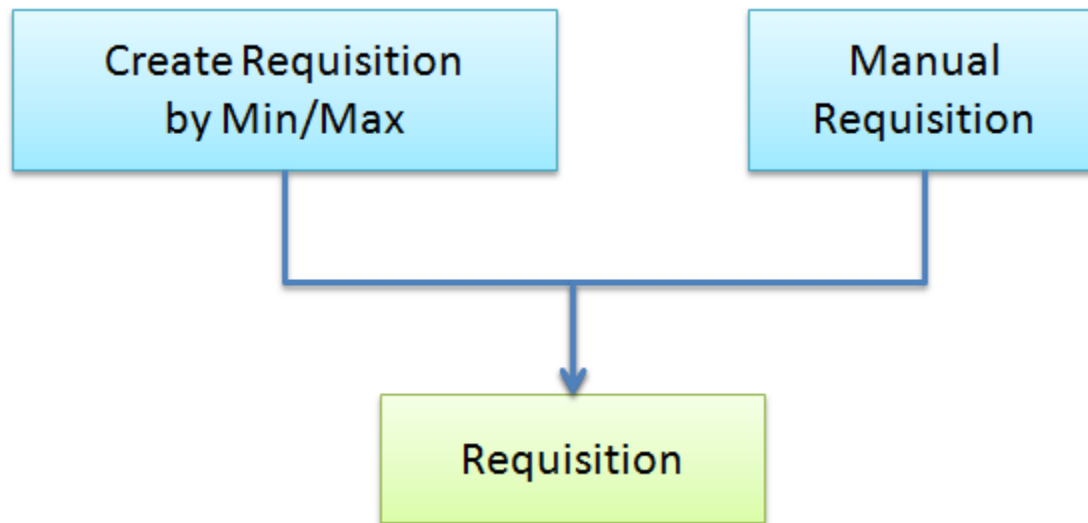

- Use requisition for spares replenishment

My REQs								
New Open Delete Refresh Cancel Print Customize Search Clear search Status log Customize Tasks								
Req no.	Status	Req on PO	Received	Due date	Time requested	Description	Wo no.	Site
RQ000490	New	None	None	1/20/10	1/20/10 7:57 PM	SATURN-PROD.2007		MySite
RQ000489	New	None	None	1/20/10	1/20/10 7:55 PM	POWERTOOL-1000		MySite
RQ000487	New	None	None	1/19/10	1/19/10 4:45 PM	My testing it.		MySite
RQ000427	Completed	All on PO	Exceeded	12/18/09	12/8/09 9:27 AM			MySite
RQ000428	Approved	Partially on PO	Partially	12/18/09	12/8/09 9:34 AM	testing req.		MySite

- Auto-Requisition Generation by Site Inventory Min/Max

Requisition Module - Roles

CalemEAM

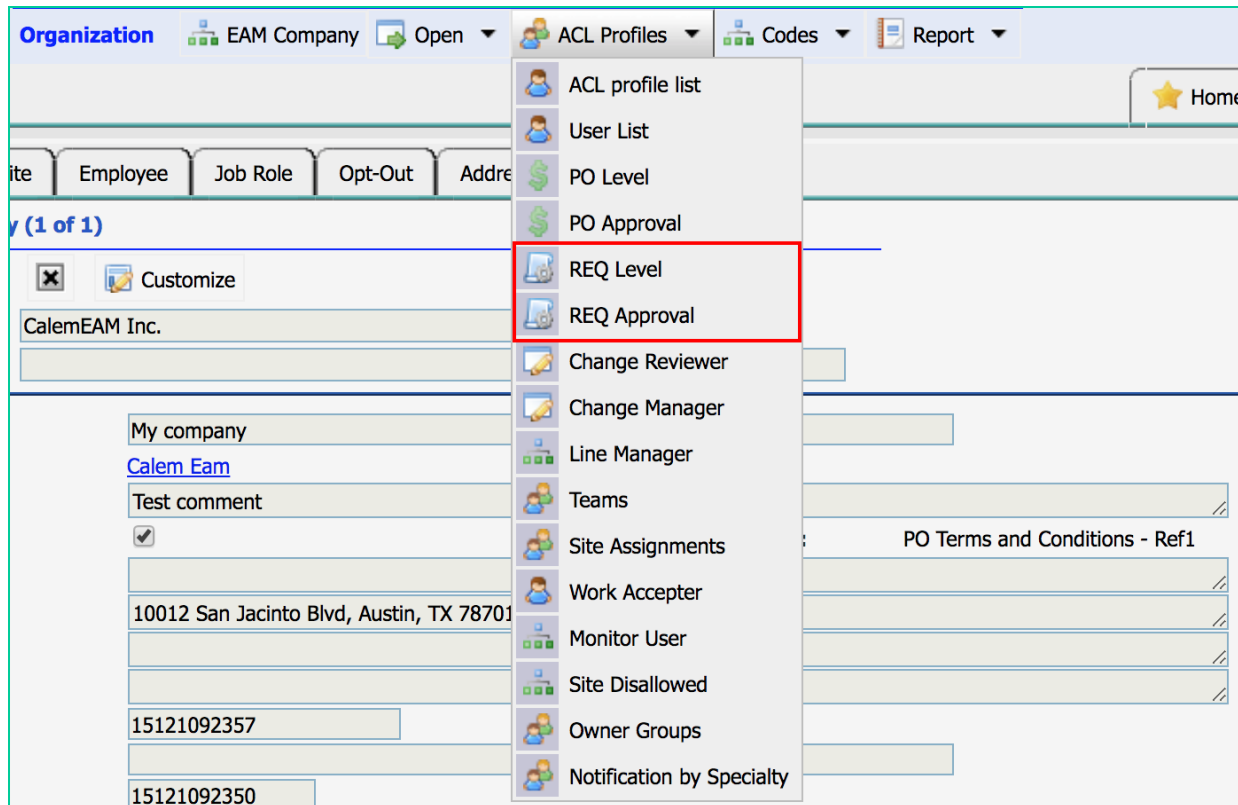

- **REQ Monitors:** users who monitor requisition activities
 - Menu path: Organization | ACL Profiles | Monitor User
- **REQ Approval Teams and Approvers:** users who approve a requisition
- **Requester:** who submit a requisition
- **Pre-approval** is optional

Role	Calem Object	Function
Managers	REQ Approver	Approve REQ
Managers	REQ Monitors	Monitor requisition activities
Requesters	User	Create REQ
Supervisors	REQ Approver	Pre-Approve REQ

REQ Approval Level & Approvers

CalemEAM

- REQ level and approval define how much an approver can approve
 - Menu path: Organization | ACL Profiles | REQ Level | Approval
- Optional:
 - Pre-Approver needs to have an approval level regardless of approval amount.

Calem uses supervisor of user record to identify the approver for a requisition.

- See this blog: <http://www.calemeam.com/calemcustomers-2/requisition-approval-routing>
- Supervisor setup:
 - Organization | ACL Profile | User List | click to open a user record, edit user's "Supervisor" field to set a supervisor
- REQ monitors are notified when a REQ approver is not identified

Set up vendors and items supplied

- See this blog: <http://www.calemeam.com/calemcustomers-2/vendor-setup-for-inventory>
- Menu path:
 - Vendor: Organization | Open | Vendor
 - Vendor Items: Purchase | Open | Vendor Prices

Requisition – Creation

CalemEAM

- Set “Due date” and “Wo #” if any
- REQ # will be generated by Calem

Requisition – Create PO from REQ

CalemEAM

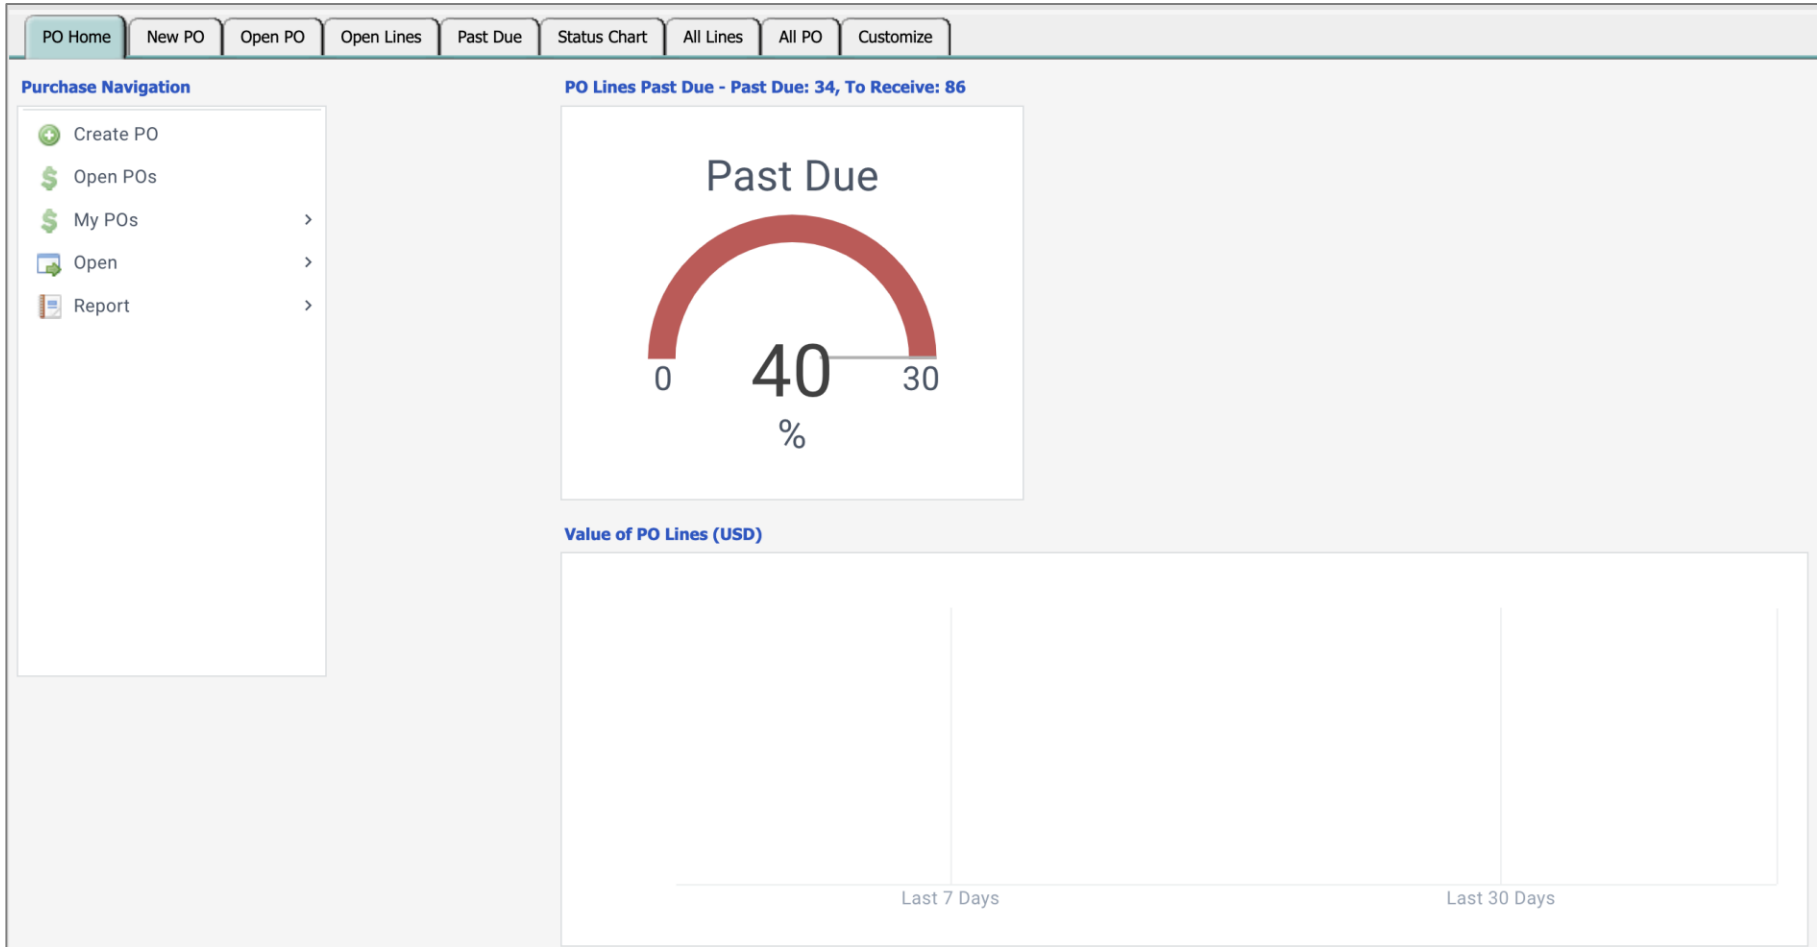

- A PO can be created from REQ
- REQ must be approved

The screenshot displays the 'Requisition (4 of 113)' form in the CalemEAM system. At the top, there is a navigation bar with tabs: 'Main', 'Items', 'Document', 'Log', and 'Customize'. Below this, the form title 'Requisition (4 of 113)' is shown. A toolbar contains several icons, including a green plus sign in a circle labeled 'Create PO', which is highlighted with a red rectangle. Other icons include a folder, a document, and a 'Customize' button. The form fields are organized into two columns. The left column includes 'Req #:' (RQ010738), 'Status:' (New), 'Priority:' (Operation), 'Due date:' (Fri, 7/27/18), 'Site:' (SiteA), 'Requester:' (Calem Eam), 'Approver:' (Calem Eam), and 'Assigned to:' (empty). The right column includes 'Source:' (Other), 'State:' (Open), 'Req on PO:' (None), 'PO:' (empty), 'Shipping type:' (Ground), 'Vendor site:' (empty), 'Time requested:' (Fri, 7/27/18 11:17 AM Central), and 'Time assigned:' (empty).

Requisition (4 of 113)	
Req #: RQ010738	Source: Other
Status: New	State: Open
Priority: Operation	Req on PO: None
Due date: Fri, 7/27/18	PO:
Site: SiteA	Shipping type: Ground
Requester: Calem Eam	Vendor site:
Approver: Calem Eam	Time requested: Fri, 7/27/18 11:17 AM Central
Assigned to:	Time assigned:

Hands-On

- Define req Levels and Approvers.
- Assign your login a REQ approval level
- Create a requisition
- Add an item to the REQ
- Approve Requisition
- Create a repair requisition
- Create a PO for the repair requisition

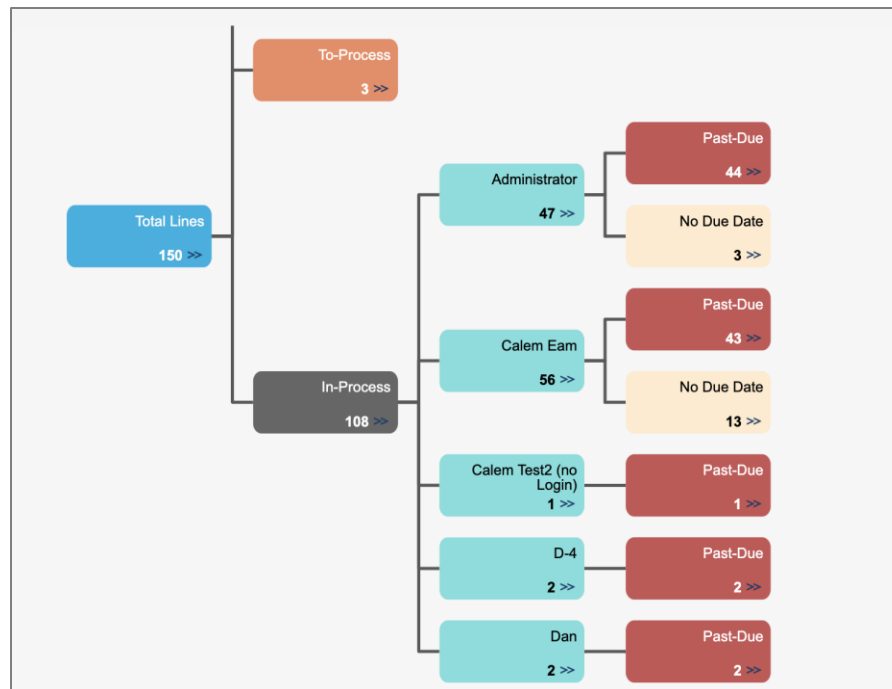

Product – Purchase Module

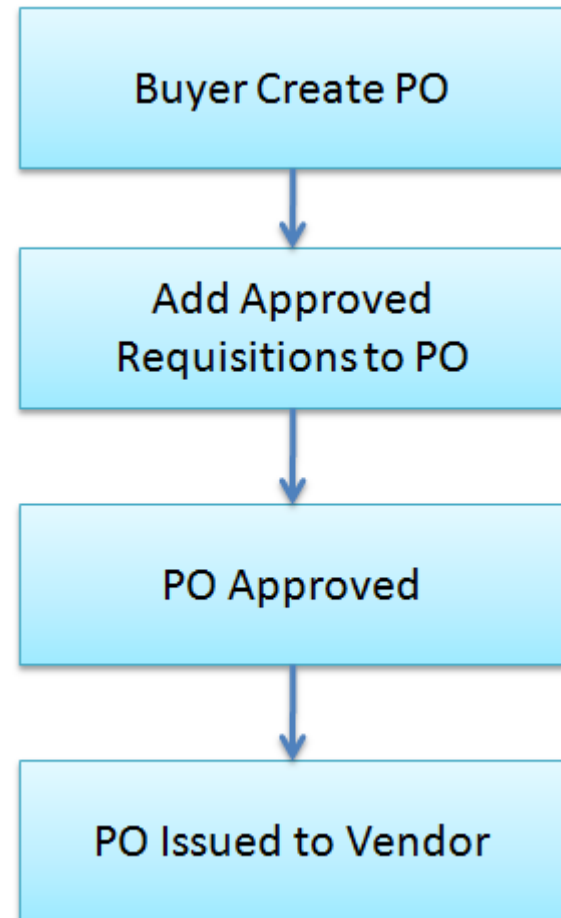

CalemEAM

- Use purchase orders to order spares

My POs							
+ New Open X Delete Refresh X Cancel Print Customize Search Clear search Status log Customize Tasks

- Create Purchase Orders by Buyers
- Add Items from Approved Requisitions
- Tax Rates
- Vendor and Price

- Approver – approves PO
- Buyer – executes a PO
- Optional:
 - Pre-Approver: pre-approves a PO before approval

Role	Calem Object	Function
Managers	PO Approver	Approve PO
Buyers	User	Create PO
Supervisors	Pre-Approve	Pre-Approve PO

Purchase Module – Approval

CalemEAM

- Set PO Approval Level Amounts
- Assign PO Approval Level to Users
 - A user can approve a PO by approval level

The screenshot shows the CalemEAM interface for the Purchase Module Approval. The top navigation bar includes 'Organization', 'EAM Company', 'Open', 'ACL Profiles', and 'Codes'. The 'ACL Profiles' dropdown menu is open, displaying a list of options. The 'PO Level' and 'PO Approval' options are highlighted with a red box. The main content area shows a table with columns for 'Employee', 'Job Role', 'Opt-Out', and 'Address'. The table is currently empty, and the 'Customize' button is visible. The bottom section shows the company name 'CalemEAM Inc.' and a link to 'My company'.

Employee	Job Role	Opt-Out	Address
----------	----------	---------	---------

PO Module - Creation
